SANTIAGO PARADA

DATA SCIENTIST | MACHINE LEARNING | PRODUCT & RISK ANALYTICS

Bogotá, Colombia | parada.santi@gmail.com | linkedin.com/in/santiago-parada-rodríguez | github.com/santiagoparada

PROFESSIONAL SUMMARY

Junior Data Scientist with hands-on experience building end-to-end machine learning pipelines, churn and risk models, customer segmentation, and analytical tools using Python, SQL, pandas, scikit-learn, and PostgreSQL. Combines rigorous model evaluation and business-oriented threshold selection with 10+ years leading multidisciplinary projects and translating ambiguous problems into measurable decisions.

TECHNICAL SKILLS

Programming & Data: Python, SQL, PostgreSQL, pandas, NumPy, SciPy, Jupyter Notebook

Machine Learning: scikit-learn, classification, regression, Gradient Boosting, Random Forest, Logistic Regression, K-Means, PCA, class imbalance, feature engineering, model evaluation

Analytics & Engineering: EDA, hypothesis testing, bootstrapping, data validation, ETL and data pipelines, REST APIs, Git, GitHub, Matplotlib, Seaborn

SELECTED DATA SCIENCE PROJECTS

Interconnect Customer Churn Prediction | Python, pandas, scikit-learn, Gradient Boosting, K-Means | 2026

- Audited and joined four customer datasets covering 7,043 records; built leakage-aware preprocessing and classification pipelines and compared Logistic Regression, Random Forest, and Gradient Boosting.
- Improved held-out AUC-ROC from 0.809 to 0.837 and selected a business threshold that detected 277 of 374 cancellations (recall 0.741, precision 0.544); created three independent customer segments for retention prioritization.

Oil Field Investment & Risk Analysis | Python, pandas, scikit-learn, bootstrapping | 2026

- Trained linear regression models for three regions, ranked 500 candidate wells per region, and selected the top 200 under a $100M investment constraint.
- Estimated profit distributions, 95% confidence intervals, and loss risk with bootstrap resampling to recommend a region meeting a risk threshold below 2.5%.

SOFA Data-Driven Management System | Python, pandas, Flask, REST APIs | 2026

- Designed a logistics analytics system for 800+ operational records and developed six API endpoints plus processing pipelines and performance metrics for auditing and implementation tracking.

PROFESSIONAL EXPERIENCE

Founder & Director | Arcaica Lab | Bogotá, Colombia | 2013–2025

- Led multidisciplinary projects from research through delivery for more than 10 years, integrating analytical documentation, computational workflows, operational planning, and stakeholder communication.
- Secured eight competitive grants and awards from IDARTES, Colombia's Ministry of Culture, and the Bogotá Chamber of Commerce; delivered projects and educational programs in Colombia and Spain.

EDUCATION & TRAINING

Data Science Bootcamp | TripleTen | 2026 — Final project completed; Python, SQL, statistics, machine learning, data engineering, and business analysis

Technical Program in Custom Wood Furniture Design & Construction | Escola del Treball, Barcelona — Two-year program in custom furniture design, woodworking, and construction

Diploma in Local Cultural Management | Universitat de Girona / UNESCO | 2015

Rhinoceros 3D Certification | 2026 — 476 certified hours
